The Simple 1,2,3 of Calf Rearing

- Do you spend time that you can't afford treating sick calves each spring?
- Do you have high animal health costs because of sick calves?
- Are you concerned about the level of calf mortality in your herd?
- Are your calves failing to reach their target weight at weaning?
- Are you unsure of the best management practices to prevent the introduction and spread of disease?

If you can answer **"YES"** to any of the above questions, you should come along to the **Teagasc/Animal Health Ireland CalfCare Open Days in conjunction with Kerry Agribusiness** which are kindly supported by Volac, to find out more about the following topics:

- ◆ **Colostrum Management**
- ◆ **Calf Nutrition**
- ◆ **Care of the Scouring Calf**
- ◆ **Calf Performance - Weaning to Mating**
- ◆ **Biosecurity and Johne's Disease**
